

ePIPE® Chosen to Restore Drinking Water Pipes at Volkswagen's Worldwide Manufacturing Facility in Pamplona Spain

Volkswagen Navarra, the worldwide manufacturing base for the Polo model and with more than 300,000 VW Polos manufactured each year, the Volkswagen plant in Pamplona (Running of the Bulls!) is one of the largest Volkswagen producers worldwide. Some 5,000 staff are employed at this plant in Spain.

Introduction of New Technologies

The plant in Pamplona has implemented a range of projects and measures that have led to considerable reductions in electricity, gas and water consumption.

Choosing ePIPE

When Volkswagen Navarra wanted to renew the installation of the domestic hot water systems in the locker and bathrooms of the award winning facility, they chose the European patented ePIPE system.

The Spanish ePIPE licensed installer from Catalonia, Spain has now started the restoration work.

In Spain, the ePIPE system is approved for direct contact with drinking water systems by the government approved OTEC certifiers.

ePIPE reduces lead leaching into the water supply, provides corrosion protection by placing a protective coating on the inside of the pipes and prevents pinhole leaks. Pipes are restored in-place sometimes in as little as a few hours per section making it an ideal solution at this world class manufacturing facility.

About ePIPE

The patented ePIPE process involves restoring pipes in-place, with an application of an epoxy barrier coating resulting in a restored epoxy lined piping system. The process provides a solution for pinhole leaks, corrosion and lead leaching from pipes for both commercial and residential piping

systems. ePIPE service providers are located in the US, Canada, UK, Mexico, and Europe. For more information contact ePIPE www.epipeinfo.com or (888) 775-0220.

About ePIPE Espana

Headquartered in Madrid, the ePIPE team is headed up by Igancio Cler. Further information on the Spanish ePIPE operations may be directed to www.duraflo.es or to Pipe Restoration Technologies, LLC at www.epipeinfo.com
