

ePIPE[®] Saves Lavish Beverly Hills Home from Water Damage

The Problem:

This beautiful 10,000 square foot, 5 bedroom, 6 bathroom home located in the exclusive Beverly Hills 90210 neighbourhood was facing major water damage from leaky drinking water pipes. Nestled among many celebrity estates in this elite gated community, the last thing the homeowner wanted to deal with was unsightly holes in the walls and damage to their furnishings due to leaks. He was struggling with water damage remediation in numerous rooms of his home, and wanted a permanent solution to the failing pipes.

The Solution:

ePIPE[®] Restoration. The patented ePIPE process restores pipes "in-place". The ePIPE Restoration Team restored the pipes in-place, protecting the pipes from future leaks and the home from future water damage. The homeowner was relieved that there would be no more tearing up his walls, and no more damage to his one of a kind home. He can once again enjoy his home without fear of leaks, thanks to ePIPE.

About ePIPE[®]

The patented ePIPE process involves restoring pipes in-place, with an application of an epoxy barrier coating resulting in a restored epoxy lined piping system. The process provides for a solution for pinhole leaks, epoxy lining, corrosion control and prevention of lead leaching from pipes for both commercial and residential piping systems. ePIPE service providers are located in the US, Canada, UK, Mexico, Europe and Russia. ePIPE products are sold under the brand names PurPipe[®], Nu Pipe[™] and ePIPE[®].
